# Welcome

Welcome to our families' 59th Production sale on April 16th starting at 1:00 pm. There will be 88 strong bulls. The cattle market has shown considerable strength and resilience because of the strong demand for beef and the continued low cow numbers. We do not see this changing anytime soon and are excited for the future. Great news Secretary Rollins and Secretary Kennedy Just Announced strict meat label requirement for "Product of USA" meat label. The next must be "Born Here – Raised Here – Harvest Here – Processed Here." A huge win for American Ranchers and the consumers. This will help keep the cattle market stronger for a bright future.

We are committed to the approach of raising and developing these bulls based on nature's bounty and the unique environment provided by this ranch. These bulls are born later in the season with minimum labor input and with only natural protection from the weather. The cows need to calve on their own and get that calf going. Please be aware the birth weights listed in the catalog are the actual weights when we find the calves and because of our rough country and natural protection it may be a day or two after birth. We check the cows twice a day during calving and are finding this low stress environment on the cows is producing a higher calf crop percentage weaned as well as outstanding pregnancy rates. The other key to this equation is to have big, long, athletic herd bulls that can cover country with libido to get the cows bred quickly. This requires a sound structure, real muscle, and outstanding feet and legs. We are identifying herd bulls that are true working herd bulls in our rough pastures that encourage the cows to be spread out. The Mogul M65K, Bruns 5 Star, Presidential 1059, Coalition C61J, Antidote, and Pound Maker bulls are examples of aged bulls that live up to the expectations we have for them and the challenges this ranch provides. The bulls in this sale have not been pushed at any point in their lives. We believe this will add to the number of years they will remain in service for you and our program providing the athleticism needed for long term use as breeding bulls for you.

All bulls selling will be virgin bulls. The bulls will be semen checked, given pre-breeding shots and tested negative for BVD.

Notice in the records, the spread between birth, weaning, yearling weights, and high dollar beef. Remember to appraise an animal for a complete package of natural thickness, structure, maternal, breed back ability, realistic EPDs with real growth and frame and not just fed on. Our cows run in the rough river hills; they must do it all on their own and bring in a big calf in the fall and breed back in good shape.

We sincerely appreciate each of you as friends, customers, and potential customers. These cattle work for us, and we trust they will provide value to you for many years.

*Have a blessed day,*

The Larson Family

**BREEDING SOUNDNESS EXAM**

Yearling bulls have passed a breeding soundness exam.

**HERD HEALTH**

The Larson bulls and heifers are on an excellent herd health program designed to provide optimal health and reproductive efficiency. Throughout their production cycles they have been given numerous vaccines to ensure their ability to perform at the highest level. These include IBR- P13-BVD-BRSV, Histophilus, Mannheimia Multimin Vitamin Shot, Haemolytica, Pasteurella Multocida, Mycoplasma, 7 way, Pinkeye and Anthrax. In addition they have been given Dectomax injectable and an Ivermectin pour on. They have all been ear notch tested negative for BVD. The bulls have all had a Virashield 6VL5HB vibrio leptos and Fusoguard foot rot vaccine. The heifers have been Brucellosis vaccinated, pelvic measured, given Vista 3VL5 prebreeding, as well as Gaurdian. All heifers' pregnancies have been ultra sounded for age and if old enough the sex of the embryo determined. The Larson cattle have many years of outstanding success and are ready to go into any herd and get right to work.

**Gregory Animal Clinic, LTD., Gregory, SD**  
 Dr. Boaz Swift

Angus bulls were weaned on September 9 & 10. They were on a growing ration of ground hay, silage, free choice loose hay, distillers, minerals and vitamins. We try to grow them with good muscle; not burn them out with a hot ration of grain.

We believe we are offering an even, excellent, thick, super fancy and showy set of bulls that will work in anybody's herd with fantastic pedigrees and proven genetics behind these bulls.

**Larson Ranch will retain a  
 1/4 semen interest in all of the bulls.**

**For more pictures, videos, and herd sires go  
 to our website at [www.Larsonranchllc.com](http://www.Larsonranchllc.com)  
 or [dvauction.com](http://dvauction.com) or [LivestockMarket.com](http://LivestockMarket.com)**

**REGISTRATION PAPERS**

Papers will be mailed (on registered) cattle upon request of buyer unless otherwise announced. Please leave information with the clerk at settlement. We will sign and mail papers to purchaser who can send them in to be transferred.

**PERFORMANCE RECORDS**

Performance records are included for your information and guidance in selection. We consider them important but not absolute. We have tried to provide in these records enough information to help you in selecting a bull which will best fit your needs.

**TERMS AND CONDITIONS**

Terms of the sale are cash. Each animal will be sold to the highest bidder. Bidding disputes will be settled by the auctioneer, whose decision will be final. All cattle will be at the purchaser's risk as soon as sold, but will be cared for the best possible. (All remarks sale day take precedence over catalog.)

**ACCIDENTS AND LIABILITIES**

All persons attend the sale at their own risk. The sellers and sales management assume no liability, legal or otherwise, for any accidents occurring in, on, or about the premises.

**- Volume Discount -**

A volume discount of 5% will be given on the purchase of 5 to 9 bulls bringing over \$5,500 each. (not averaging \$5,500) A volume discount of 10% will be given on 10 bulls or more bringing over \$5,500 (not averaging \$5,500).

**BOTH FALL 2025 & SPRING 2026  
 SALES WILL BE TIED TOGETHER.**

This year every bull that sells for \$6,000 or more will be guaranteed against breeding injuries until September 1, 2026. We will guarantee the bulls to be breeders and to pass a breeding soundness and fertility exam (Penile Hematoma, Preputial Tear, Testiclitities) if your bull is unusable we will credit you the difference between your purchase price and the salvage value of your bull on a bull in the Dec. 2026 sale, that being said your bull will be covered for 100% value. We will try to have a loaner bull available for you to use the balance of the 2026 breeding season, (until September 1, 2026) at which time you can return the loaned bull to the Larson's. The bulls are not covered for abuse, neglect or lack of care. Any bull that brings under \$6,000 will be guaranteed at 1/2 credit towards the Dec. 2026 sale using the difference between purchase price and salvage value. We will try to have a loaner bull available for you to use until September 1, 2026 at which time the bull can be returned to the Larson's (the opportunity for you the day of the sale so you may insure your bull yourself that day.)

## BOARDING OF BULLS AFTER SALE

We can take all the bulls home and keep them free of charge until May 1st (a \$3.00 per day after May 1st). It would be greatly appreciated if all bulls could be picked up by May 30th. As the weather warms up the bulls run a higher risk of injury due to riding & fighting. We will do our best to care for the bulls but injuries can happen. Thank you VERY much.

## SALE TERMS AND CONDITIONS

Except for those stated in the below terms and conditions, there is no warranties, either expressed or implied, as to merchantability of fitness for a particular purpose with respect to the livestock being sold at this auction. The warranties and guarantees set forth in the "terms and conditions" are in lieu of all other warranties, either expressed or implies, and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claim through buyer, for any breach of warranty or guarantee therein provided, and all other obligations or liabilities.

### BIDDING

Each animal will be sold to the highest bidder without reserve. The person in charge will settle any disputes as to bids, and his decision on such matter shall be final.

### ANNOUNCEMENTS

Any changes from information of any kind in this catalog will be announced from the auction box and such announcements shall take precedence.

### BREEDING GUARANTEE

1. All animals are guaranteed to be breeders, with the exception of
  - a) Calves under twelve months of age;
  - b) Animals shown by purchaser after the sale (in cases of animals shown after purchase, the breeding guarantees, if any shall be such as agreed upon between the seller and the buyer);
  - c) Injury or disease occurring after the sale;
  - d) Gross negligence or willful misconduct on the part of the purchaser
2. **Bulls** are guaranteed breeders if not allowed to run with the herd until at least 12 months of age. Any bull which settles cows by natural service and passes fertility test made by competent fertility tester, mutually agreed upon by buyer and seller, during 6 months period of trial (provided for in paragraph 2 of the section of these sales terms and conditions) shall be considered a breeder. Any guaranties with respect to the ability to freeze semen shall be by separate agreement between the buyer and seller.
3. **Safe in Calf Females** have been examined by a competent veterinarian and are so guaranteed.
4. Bulls have passed semen fertility test.

Martin-Trudeau will be at the sale if you wish to insure your bull. Any bull bringing over \$5000.00, Larsons will pay 1/2 of the premium we also have our guarantee program found on page 2.

All of these records are provided as tools and aids in selecting a bull. But never select breeding stock just on records, but also on eye appeal, structural correctness, herd longevity of the sires and dams, fertility and herd history.

To get your weekly EPD updates, you can go to the Angus Association each Friday and view them.

**A day without sunshine is like, you know, night.**

# WHAT ARE EPDs?

**ESTIMATED PROGENY DIFFERENCES (EPDs) ARE A PREDICTION OF HOW A SIRE OR DAM'S OFFSPRING WILL PERFORM COMPARED TO OTHERS.**

EPDs are a representation in the difference in pounds, inches, or centimeters (depending on how that trait is weighted or measured.) The EPD numbers do not correlate to an actual weights or measurement however, there are only to be used to compare against other animals EPDS to represent a difference in genetic potential. For example, a 2.1 BW EPD does not correlate to an 85-pound actual calf. When comparing a 2.1 BW EPD bull to a 1.1 BW bull you could expect a one-pound difference in actual birth weights between the two sires.

**Calving Ease Direct (CED):** The percentage of unassisted births of a sire when used on first calf heifers. Higher is more favorable. This is to be used when looking for bulls to be used for heifers. We recommend an 8 or higher.

**Birth Weight (BW):** The difference in pounds of birth weight. In today's production Angus genetics, we find that there are not many bulls that should present calving difficulties in mature cows. The BW EPD is preferred as a selection tool more than an actual birth weight of the Bull. Environment and management can change the birth weight of an animal so drastically that the EPD is a better tool.

**Weaning Weight (WW):** The difference in pounds at Weaning. Also seen as a 205 weight in places.

**Yearling Weight (YW):** The difference in pounds at yearling. Also seen as 365-day weight in places.

**Milk (MK):** The difference in pounds at weaning as a result of milk production of daughters. Honestly this EPD we don't worry about unless they are in the top 5 or bottom 5 % of the breed as there is little to be known about how much milk is actually being produced among the different environments and management in this country.

**Scrotal (SC):** The difference in scrotal circumference in Bulls sons

**Docity (DOC):** The difference in docility scores. Cattle are given scores for disposition and a higher docility is more favorable.

**Carcass Weight (CW):** The difference in pounds of a hanging carcass weight

**Marbeling (MB):** the difference in the USDA marbeling scores. Higher is more favorable.

**Rib Eye (RE):** The different in the square inches of the rib eye.

**\$Maternal (\$M):** An index (combination) of multiple EPDS that pertain to the profitability difference from conception to weaning for those retaining their own replacement females. Index's are contrived of scenarios that don't necessarily fit each

production producers management, resources, niche markets or goals. You can also use Index's for quick sorts but you would have to look towards the individual traits of your needs ideally.

**\$Beef (\$B):** An index (combination) of multiple EPDS that pertain to the terminal profitable difference from weaning to harvest. This index awards cattle for higher YW, CW, MB, RE and lower fat.

**\$ Combination (\$C):** The index (combination) of Index's. This primarily is a combination of \$Maternal and \$Beef. This index can easily be influenced by terminal or maternal trait and is not a true prediction of something complete or combined. In most cases it can be, but we still encourage you to look at all traits that best suit you and use \$C as a quick sorting tool.

**DNA scores:** Below many EPD bars you will find a line of 18 traits (many that have been abbreviated just like the EPDS above). These are DNA scores and are represented as a percentile rank within the breed (lower is more favorable). This just shows another layer of the tools used in the decision making that goes into the more accurate EPD above The EPD takes into account, parental information, DNA information, and weights and measures of the actual animal.

**%Ranks in EPDs:** Under many EPDs you will see % ranks. That shows how that animal ranks within the breed for that trait. Example, 1.87 MB 1%, that means that animal rank is in the top 1% of the breed for MB EPD.

There are 26 different EPDs and Index's provided by the American Angus Association. We list the EPDS and Index's that are most pertinent to our customers to save space and time. We know some prefer more information and it is always available at WWW.Angus.org In the upper right-hand corner enter the animal's registration number in the research bar and the entire pedigree and EPD profile is at your fingertips.

**Never go to a doctor whose office plants have died.**

## What is a good bull worth?

How do you put a fair price on a bull? My experience is that a great many bulls are underpriced. After investing time and money to produce a genetically superior product, far too many bulls go for little more than fat cattle prices, far less than what bulls are worth. The genetic package that is bred into a bull distinguishes them from a baloney bow. Genetics, documented by performance records, make a bull valuable. If you start with the basic Bologna price bull, then add on the value of the genetic package, it may surprise you what the bulls are worth.

Most people don't think about it, but a Bologna bull costs little to own. A 1,200 lb. yearling at \$3 per pound is worth \$3,600 for slaughter. If he is used for five years and grows into a 2200 lb. chunk of Bologna bull, he will at \$2 a lb., have a \$4,400 value salvage. And the \$800 increase in value of the bull will pay the interest and feed him. Consequently, this base price shouldn't be considered an expense in bull selection. You will eventually get it all back, plus interest. For this example, let's assume that a potential customer is a commercial producer, who sells everything as feeder calves and raises his herd replacements. Let's also assume any bull for sale will sire 25 calves a year; 20 that will be sold as feeder calves and five that will be kept as herd replacements. If a bull will add 40 lbs. to the weaning weight of a feeder calves, then the 20 calves sold will weigh 800 lbs. more than the average of the buyer's calf crop the year before. Figuring \$4.50 per lb., the Bull will earn an extra \$3600 for the new owner, the first year, or \$8,000 in five years. A bull at \$21,600, (base price of \$3,600 and \$18,000 additional earnings) the buyer can expect to get all of this investment back over a five-year period. This bull offers even more; the five replacement heifers represent considerable added genetic value, we are not sure how you figure this value, but if the five heifers were sold with the rest of the calves, their added weight would make them worth an additional \$900 in five years. This means that the bull will pay for himself at a sale price of \$40,000 in five years.

You have more to sell than weight gains. If your records document calving ease, this bull may well provide a 4% better calf crop. That is one more calf to sell for each 25 cows he settles, five more during his useful life. An extra 500-pound calf at \$4.50 is worth \$2250 and in five years that adds up to \$11,250. The bull is now worth \$29,250 added earning power to the customer.

Figure what your bulls can earn and be prepared to see in black and white the Bologna bulls plus genetic.

When I was a kid my parents moved a lot, but I always found them.

Great birth to yearling spread on this bull. Big pelvic bull.

Before you marry a person, you should first make them use a computer with slow Internet to see who they really are.
